

WBS

1. Plan:

- 1.1 Create Stakeholder engagement plan.
- 1.2 Communicate with customer to get the full requirements.
- 1.3 Decide the team members who will work on this project.

2. Design:

- 2.1 Design the software architecture.
- 2.2 Design the Sequence diagram for the application.
- 2.3 Divide the work into modules.

3. Implement:

- 3.1 Develop the application to be used by users.
- 3.2 Develop an application to be used by shops (if it's required).

4. Test:

- 4.1 Start testing each module in the app.
- 4.2 Test the application to be used by shops.

5. Deploy:

- 5.1 Get approval from the customer that the requirements are met.
- 5.2 Start deploying the app for a small number of shops.
- 5.3 Get feedback to deploy the app on a larger scale.
